## RESULTS

## Innovating since 1984

Established in 1984, we are the largest independent fabricator of PVCu and Aluminium windows and doors in the South East.

From our factory in Eastbourne we supply and support our customers throughout London, the South East and beyond.

## What we do?

We work with our customers, in partnership, delivering the right British made products, services and support to grow their business.

Listening, learning and understanding how we can actively help them to succeed.

## Why use us?

Are you looking for a different type of supplier that can deliver a different type of relationship?

A full range of energy efficient windows, conservatories, doors and accessories? Market leading specifications and the PlatinumNRG brand to promote them? A partnership team ready to work with you into the future? Welcome to Whiteline.

## The Present

We care passionately about our customers, staff, and the environment. We strive for continuous improvement in our operations and with our suppliers, so we can deliver the products, services and support that you need.

We offer a fantastic PVCu range, such as our unique **slimSASH** and **flushSASH** range as well as **sculpturedSASH** and **chamferedSASH** windows and doors.

In addition to PVCu, we also offer an extensive range of Aluminium windows and doors, including the revolutionary Sheerline windows, to meet the needs of your customers.

## The Future

We are committed to innovation and improvement of our product and service offerings.

We have the technology to deliver products that match the most demanding energy standards, like A+ rating and PassivHaus, that customers will increasingly demand.

We will be making it easier for you to sell and deliver to them, with real time design, web ordering and delivery scanning technology, making transactions faster and business less work.

## Helping you

Starting with our products - we've ensured that we have window and door systems suited to every property type in the UK. All of our products can be tailored towards individual requirements in terms of aesthetics, security and insulation.

For consumer confidence, we have accreditations for all of our products and can supply certification where necessary.

Logistically, we have an extensive vehicle fleet to deliver across a large part of southern and eastern England.

All deliveries are tracked and monitored with advance notice of arrival.

In-house, we offer full technical support on every aspect of construction and application.

We have a dedicated Customer Services department to look after you and form your point of contact within the company.

Our dedicated Processing Team handle quotations and process orders based on the information supplied to them.

Our expanding on-line services range from offering your own website, bespoke brochures, downloadable PDF brochures to name just a few.

# environmental

## materials, manufacture and sustainability

### PVCu

With environmental issues being at the forefront of today's media it is very easy to confuse modern PVCu windows with the damaging, non-degradable plastics so abundant in everyday life.

#### **IT'S NOT PLASTIC!**

uPVC (unplasticised PolyVinyl Chloride) was the term used in Britain before the name was changed to PVCu in the late 1980s to fall in line with the rest of Europe. However, many people assume that uPVC and PVCu refers to different materials - they are exactly the same!

#### **NON-POISONOUS**

Differences do occur within the PVCu itself by way of stabilisers - many companies have used lead whereas we have only used calcium. Therefore the material itself is non-poisonous in use and during recycling.

#### **RECYCLABILITY**

PVCu windows use less energy to produce in a factory in comparison to both aluminium and timber windows. Our PVCu window is 100% recyclable and can be recycled up to 10 times, giving each window an estimated life span of 350 years!

#### **ENVIRONMENTAL IMPACT**

The material itself, its reduced manufacturing and recycling costs and long term product-life leave a small carbon foot print whilst the ongoing energy savings are higher, with more PVCu windows achieving BFRC 'A' ratings than other materials.

## ALUMINIUM

Aluminium is known for being lightweight, durable, and low maintenance, while also aiding the high performance of our systems due to its immunity to UV, low conductivity, and fire resistance.

#### **RECYCLABILITY**

Up to 90% of all aluminium used in construction is recycled, using 95% less energy to manufacture than its primary production - with no deterioration in quality.

Aluminium does not age like other organic materials and needs no protection from ultra-violet light. Its overall life-cycle is more environmentally friendly due to the minimum energy required in maintenance and the well-established, proven design life of aluminium assures that it will provide a long term solution year-on-year with the guarantee of 100% recyclability at the end of a building's life.

**PlatinumNRG slimSASH** casement windows are OUR most popular choice available today. The sashes or opening vents of these 70mm PVCu windows use a special slim profile, exclusive to **PlatinumNRG**.

**slimSASH** has a larger glass area which allows more daylight into your home, but still achieves outstanding energy efficiency due to its 6-chamber sash design. **slimSASH** is available in an extensive range of finishes.

Externally, the sashes are identified by a slim chamfered profile with a subtle feature groove surrounding the glass unit. These slim profile PVCu windows have a chamfered external profile with a choice of chamfered or sculptured internal beading.

**PlatinumNRG** use a patented co-extruded bubble gasket provides an effective seal against the weather adding to the energy efficiency of the window. This co-extruded bubble gasket is fabricated with the profile and has been tested to BFRC energy rating standards with zero air leakage.

Introducing a low maintenance PVCu window with a flush-fit, timber appearance.

The **PlatinumNRG flushSASH** design is reminiscent of a traditional, pre-1932 timber window and has become increasingly popular in conservation areas as a result.

Depending on the colour or foil finish you choose, the **flushSASH** range can offer a modern, contemporary appearance too – so it complements almost every property style.

As with the rest of the **PlatinumNRG** range, the **flushSASH** system has been designed from scratch by a team of experts, with A+ energy ratings and U-values as low as 0.9 W/m<sup>2</sup>K.

The unique new 85mm deep frame incorporates seven chambers, for optimal thermal performance and strength. A classic, deep sculptured edge detail with transoms and mullions that can be mechanically jointed to replicate traditional mortise and tenon joints.

Based on the thermally efficient PlatinumNRG FlushSASH system, Revival offers the realism of a pre-1930's timber window combined with 21st century benefits - featuring a number of exclusive enhancements.

# chamferedSASH

chamfered frame, choice of beads

**PlatinumNRG chamferedSASH** and **sculpturedSASH** are at the core of our casement window range. They can be had with either a sculptured frame, sash and beads or with a chamfered frame, sash and beads - as their name suggests.

Both systems are similar to **slimSASH** in terms of design and performance - the key difference is that the sashes are 5mm wider.

A 6-chamber sash and frame profile ensures excellent thermal performance and the structural design of the profile ensures a strong and rigid installation.

In it's sculptured form, it suites perfectly with the Alumina bi-fold door system too.

The open-in style of window is very much a European design and is ideal for cleaning from within (in the turn position).

Ideal for high-rise as well as low-rise applications, the tilt and turn window offers a greater scope for larger opening lights than a traditional casement window and the larger panes of glass help with thermal performance. Larger glazing also allows for more light coming in and a greater view out.

Perfect as a fire escape or simply to let in more fresh air, most windows are supplied as 'tilt before turn' to make them safer and avoid the risk of children opening them fully in the first instance.

With many practical benefits, **PlatinumNRG flushSASH Tilt and Turn** windows are also available with as many options as our popular casement windows.

The **PlatinumNRG V-SASH Ultimate** is the epitome of the NRG Collection design philosophy – an outstandingly authentic, exceptionally-performing work of art.

The V-SASH Ultimate was one of the very first PVCu sash windows to be cleared for use in conservation areas – and it's still the best. With slim timber-like profiles and a 35mm meeting rail, no other sash window looks as authentic. And with period features as painstakingly detailed as full mechanical joints, deep bottom rail and external putty lines, it would take an expert to tell it apart from a genuine timber sash.

What's more, you get all that careful craftsmanship, historic detailing and vintage appeal with the all-round exceptional performance of twenty-first century PVCu. It's why we call it the V-SASH Ultimate.

#### V-SASH Ultimate Period Features

It's the little things that make the NRG Rose special – the tiny details that make it virtually indistinguishable from a classic timber sash.

Authenticity is the watchword of the **PlatinumNRG V-SASH Heritage**. Accepted for use in conservation areas as discerning as the London Borough of Kensington and Chelsea, Lincoln, Worcester, and Cambridge, the Heritage Rose looks every inch the iconic timber sash window – while delivering the convenience and all-round excellence of modern PVCu.

All around the UK, more and more people are choosing the **V-SASH Heritage** when it comes to replacing their existing windows – won over by a generous selection of colour and finishing options, its robust energy and security performance, and, above all, its incomparable vintage charm.

With its sleek sight-lines, deep bottom rail, external putty lines and other period detailing, the **V-SASH Heritage** is near-indistinguishable from a timber original, offering a level of class and authenticity second only to the **V-SASH Ultimate**.

Take one of the most respected PVCu systems on the market and turn it into an impeccably stylish timber-effect sash window – that’s the genius of the **PlatinumNRG V-SASH Modern**.

With a more contemporary appearance than either of its NRG Collection siblings, the V-SASH Modern is a hugely versatile window, ideally suited to everything from upgrading existing windows on older properties to adding retro-chic to newly built homes.

Inward tilting for easy cleaning, hassle-free maintenance and an extensive variety of finishing and hardware options make the V-SASH Modern one of the all-round best sash windows currently available.

The V-SASH Modern delivers affordable authenticity – a significant cut above your standard PVCu sash with both its vintage detailing, and outstanding all-round performance. Made-to-measure V-SASH Modern won’t rattle, warp or rot – and will deliver standout features

**PlatinumNRG PVCu Bi-Fold Doors** will transform, modernise and add real value to your home.

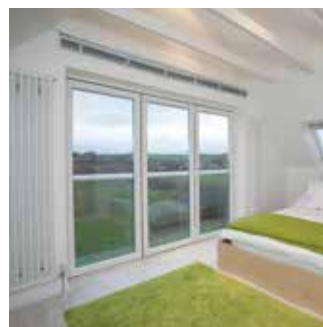

Your home will be lighter and brighter. Enjoy the feeling of more space. Our bi-folding doors are some of the most attractive, simple to use, energy efficient and secure on the market. Designed to enhance your home they will maximise the space available.

Fully opened the **PlatinumNRG PVCu Bi-Fold Doors** are slim and unobtrusive, and when closed they offer all the benefits of a modern double glazed patio door.

Slim frames give you more glass, less PVCu and more natural light. The hardware is concealed so only the hinge knuckles show.

Low threshold options are ideal for wheelchair users and family homes as they create fewer trip hazards for the elderly and the very young.

Available in a varied range of colours and finishes, your door can easily be tailored to suit your personal taste and home.

THE COMPLETE FENESTRATION COMPANY

AW690

AW624

The **PlatinumNRG Modern Aluminium Range** encompasses slim, flat sashes together with large expanses of glass to offer an almost uninterrupted view from within.

Opening up a room to let the light flood in, these windows have narrow framing and can offer uninterrupted glazing to a height of 2 storeys. Get the look with the ultimate in maximum glazing, minimum framing aluminium window systems and add a whole new perspective to your home.

A flatter, slimmer sash help define the style of the **PlatinumNRG Modern Aluminium Range** with a square or chamfered glazing bead. Simple, sleek lines work on many styles of property but probably more suited to a modern home.

Through innovative design and superior build quality this window system offers high thermal and acoustic performance alongside the inherent strength and low maintenance benefits of aluminium to make your home safe and secure.

THE COMPLETE FENESTRATION COMPANY

## AW610

## AW613

Highly flexible and adaptable, our **PlatinumNRG Traditional Range** is ideal for homeowners looking for a traditional framing look.

### AW610

The sash protrudes from the frame with a **chamfered** profile around the outer edges along with a **chamfered** glazing bead.

The chamfered glazing bead emulates the style of a typical timber window as it gives the appearance of having held the glass in place with putty - what we refer to as a 'putty-line'.

### AW613

Our traditional **Ovolo** window is essentially the same window as our traditional Chamfered but uses a sculptured (or **Ovolo**) profile around the outer edges of the sash. This gives the sash a more decorative appearance and is often referred to as 'soft-line'.

Again, this would be found on period timber windows and can be glazed with either the putty-line chamfered bead or a square bead.

Our **PlatinumNRG Heritage** windows are an ideal replacement for current steel-framed glazing in your home.

Manufactured from lightweight aluminium, they offer a higher performance alternative to traditional alternatives, whilst still retaining the look and style of your property.

Designed to improve thermal and acoustic performance, this system is low maintenance and customisable, yet still replicates the narrow sight lines that traditional steel windows provide.

A choice of either a 'stepped' Crittall-style AW686 or a chamfered 'putty line' AW614 profile capture the style and elegance of the British heritage steel windows that were predominantly used throughout the last century.

THE COMPLETE FENESTRATION COMPANY

The ultra slim 59mm sightlines maximise incoming light, while our patented construction method – using threaded screws to bind corners tightly together in perfect unison – creates perfect run through mitres on internal joints, doing away with the unsightly junctions of square cut beads seen on ordinary aluminium windows.

We've also designed out the stepping of misaligned corners, allowing each Sheerline window to be individually hand tuned to perfection. Leaving you with the perfect balance of understated refinement and exacting quality standards.

Alumina takes all the benefits of an aluminium door and adds extra features to make it the perfect choice where you need strength with size. And as it's designed to perfectly match Liniar's range of thermally efficient PVCu windows, you can mix and match for an overall cost effective installation.

An intelligent combination of form and function, our highly versatile **PlatinumNRG BSF70** and market-leading bi-fold sliding door system gives you maximum control over the style and operation of the doors. Multiple panels can be added to accommodate the design specifications of your building, with the option to open in or out as required.

The system also boasts a unique flush line pop-out handle that allows for square flush stacking panels when doors are fully open.

THE COMPLETE FENESTRATION COMPANY

## Stunning Aesthetics

The woodgrain finish on a **PlatinumNRG GRP** composite door is developed from oak tree wood grain, creating a beautifully authentic appearance and superior performance that is only available on a **PlatinumNRG GRP** door.

Our range of colours, styles and glass options will make your door truly unique and by ensuring that we perfectly match the colour, wood grain and moulding on the glazing cassettes, you can guarantee a flawless finish.

Our glass designs complement our door styles and colours and are triple glazed and laminated as standard for extra security and energy efficiency.

# entrance door

GRP composite doors

## Enhanced Security

Our **PlatinumNRG GRP** composite door offers enhanced security thanks to its rigid polymer sub-frame, high density insulated core and high impact resistant GRP skin.

The door leaf and glazing system are major components when part of a door set and have a proven ability to achieve PAS24:2016, industry's enhanced security standard, a prerequisite in attaining certification to Secured by Design a police initiative to protect against unlawful intrusion.

Many composite doors on the market utilise a traditional 'stile and rail' internal subframe, which offers inferior performance when compared to our solid LVL core.

Stile and rail sub-frames are usually filled with either a PU foam core, or a mix-species timber core. This notably reduces the inherent strength of the door, and can even result in some doors bowing due to the lack of structural integrity.

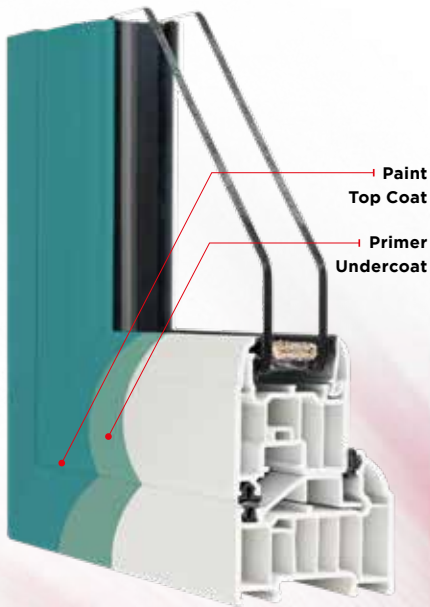

PAS24 UPGRADEABLE

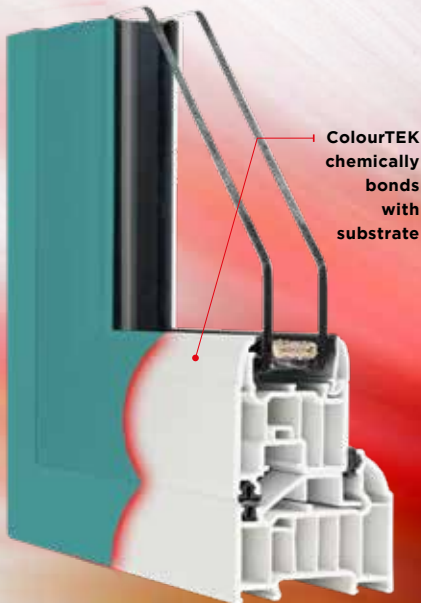

Composite

Choose from the Classic, Metro or Country collection to bring a personal touch to your home. Our composite doors are able to offer everything from country charm to the cutting-edge flair of the modern day.

Previous generation spray paint finish often necessitating an undercoat/primer. The paint adheres to the undercoat which in turn adheres to the substrate. The paint sits on top of the substrate and consequently is prone to abrasion and chipping.

Molecular Cross Bonding (MCB) uses a chemical process to bond and combine with the substrate it's being applied to. The substrate can be PVCu or aluminium and either of these can have a foiled woodgrain or powder-coated finish.

The bonding process ensures that even when different frames, door skins and materials are used, a consistent colour and finish can be applied for a uniquely co-ordinated appearance, including the gasket!

# colourTEK

molecular-bonded colour finish

Services

## In addition to our standard finishes...

Currently we can offer a huge choice of colours from the RAL and BS colour libraries to cover almost any traditional or modern architectural requirements.

We can offer this service on products that include windows, doors, composite doors and bi-folds.

**ColourTEK** is based at our own manufacturing facility which means excellent logistics for us as a company and as a consequence, improves turnaround times to our customers with better quality control.

Platinum<sup>®</sup>  
NRG

**Whiteline 360** focuses on each of 6 key stages of the business cycle, with a full and increasing menu of options for selection and detailing within each.

**Unique Products**, such as SlimSASH, FlushSASH and the new Revival System, create demand and distinction with PVCu, aluminium production and quality all in-house

**Exclusive Branding** using the PlatinumNRG brand and marketing support packages that help to promote and develop sales.

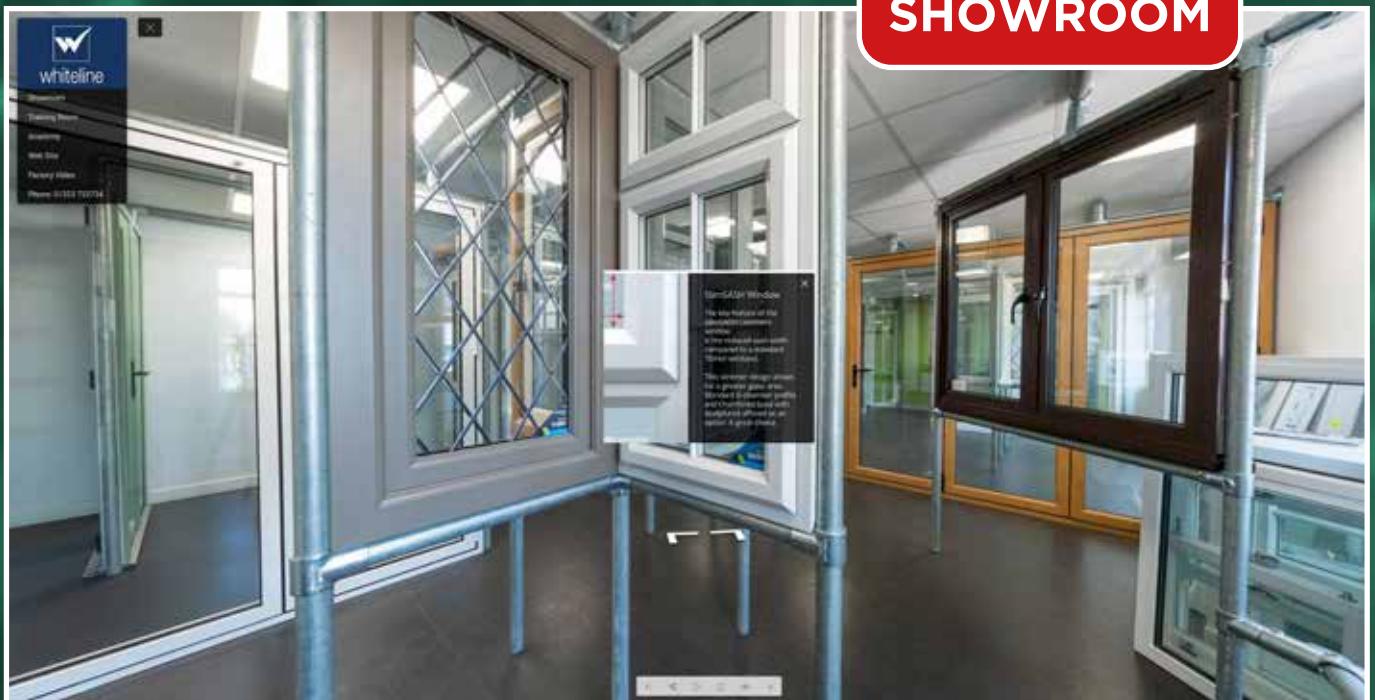

**Lead Generation** develops new business leads and sales demand for the installer to convert, providing an immediate sales pipeline for the retail installer.

**Business Support** tools ensure efficient and effective communications and administration, including selling aids and administrative efficiency tools.

**Service Delivery** cements best practice logistics from procurement to installation: and finally last but not least

**Relationship Management** is the people side of the day to day and strategic management of every interaction between Whiteline and the customer.

## VIRTUAL SHOWROOM

Our 'virtual showroom' gives an overview of our product range and enables a 'walk-through' that demonstrates window and door views from different angles.

Services

With a product range as diverse as PlatinumNRG it can be very difficult to convey the vast range of styles and finishes with brochures and websites.

This is where we can utilise digital technology to create 'virtual' products that demonstrate the style of window and door a customer maybe interested in. On top of this we can then colourise the product to match the finishes available for this product.

**We offer a full-training service in-house - not just for our staff but also for our expansive network of customers and their respective installation teams if ever required.**

We produce our own training videos to help convey practical information on everything from construction, repair and individual installation requirements.

Much of this training can be accessed through our customer portal - the Solution Centre.

# solution centre

web-based information centre

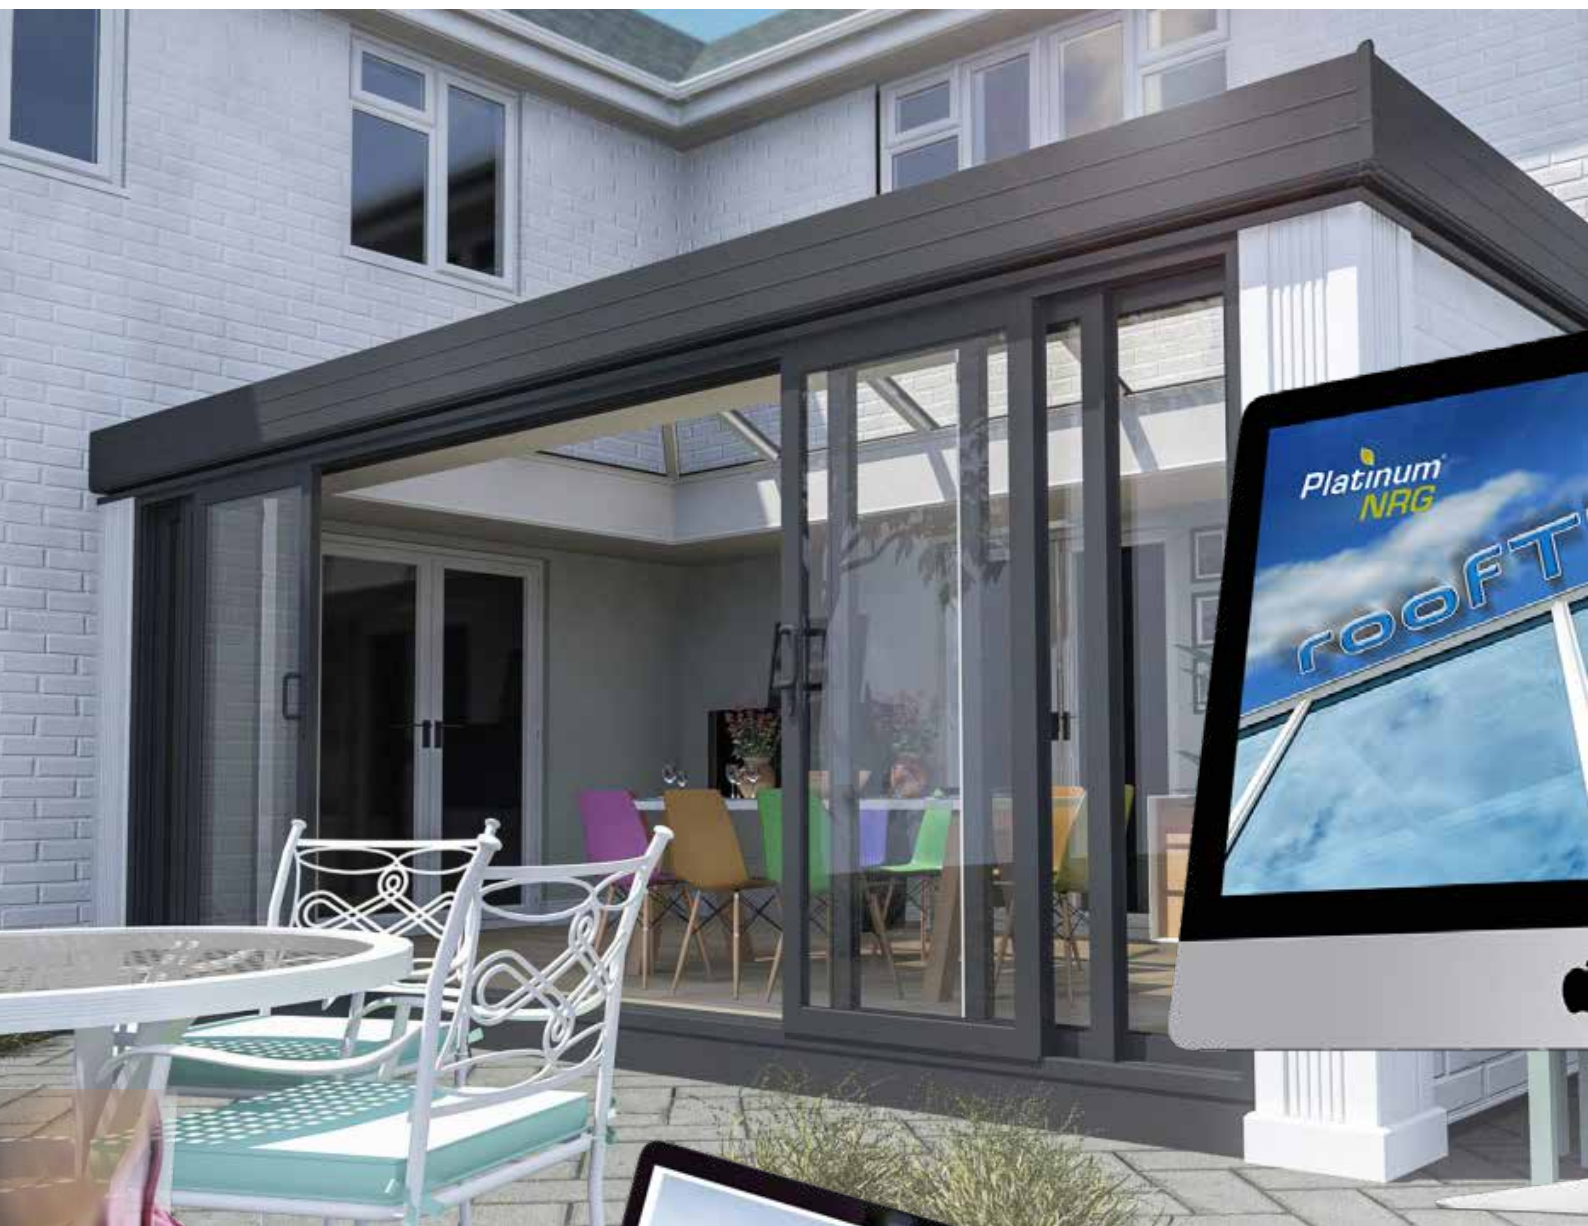

**Introducing our new web-based customer solution centre. The system offers facilities such as submitting tickets, viewing both current and historic tickets and their status.**

In addition, a comprehensive search capability enables you to find technical information, solution articles, images, videos and more and is fully mobile friendly when you are out and about.

We will be in contact with you shortly to help setup your access details and to answer any questions you may have.

<https://customersupport.whiteline.co.uk>

Every element of the conservatory can be priced in the same way that you would build the real thing. The intelligent pricing module takes in everything - from site preparation, ground-works and external drainage, building works, the frames and roof, and finally electrics, plumbing, carpentry and fitting.

## PC-based conservatory visualisation tool

roofTEK conservatory design software allows the conservatory sales team to 'build the dream' for their customers. Within a few minutes a full colour photo-realistic image of the conservatory, pulled from a wide library of different designs, can be displayed on the screen, with the customers' choice of frames, roof glass, brickwork, flooring and more.

The conservatory can be rotated on the screen, and can be superimposed easily onto a photograph of the clients' property.

Additional modules allow the roof, frames, ground works, building work, electrics and plumbing to be priced quickly and accurately and a range of attractive, professional presentations, quotations and contracts can be printed.

Our 3D design software offers a comprehensive range of styles, glazing, colour and roofing choices. Supplementary modules can be purchased as 'add on' options to include Bespoke Design, traditional Orangeries, Livin Room\* or Summer Orangery\* style internal pelmet and external fascia/decorative gutter, Tiled Roofs, Loggia\*, Pilaster and Veranda\*.

\* These names are trademarks of Ultraframe and Global roofs and are used to describe the styles of roof only. We are able to model any roof section accurately and in full 3D

your online brochure and website builder

Services

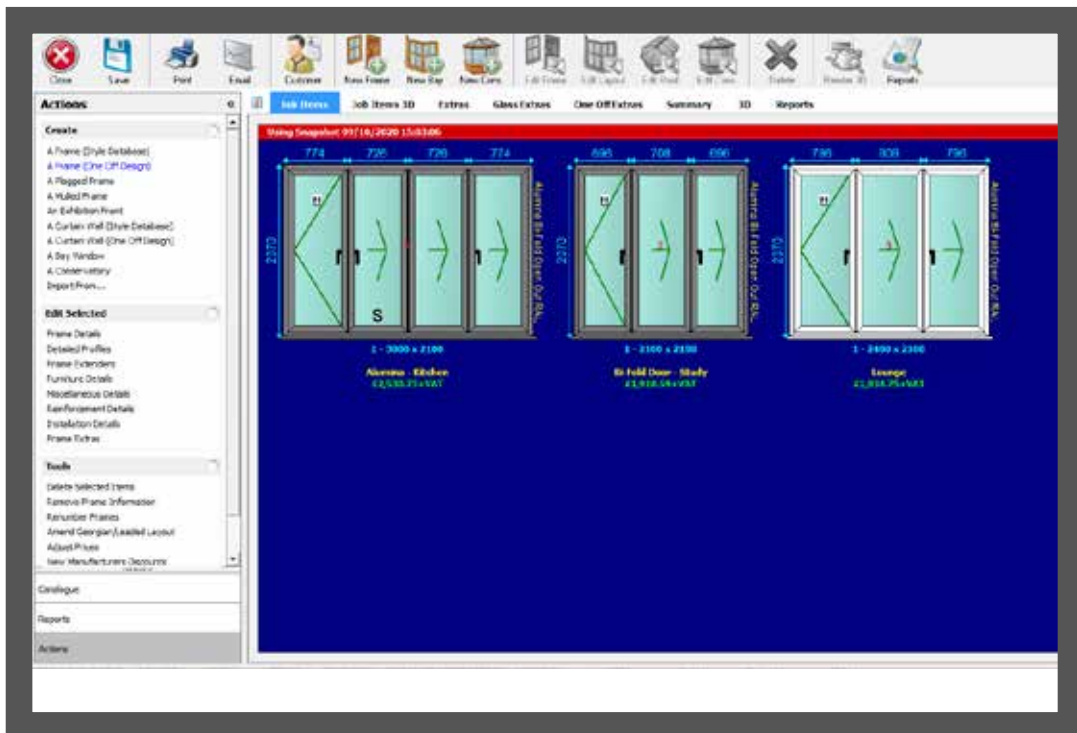

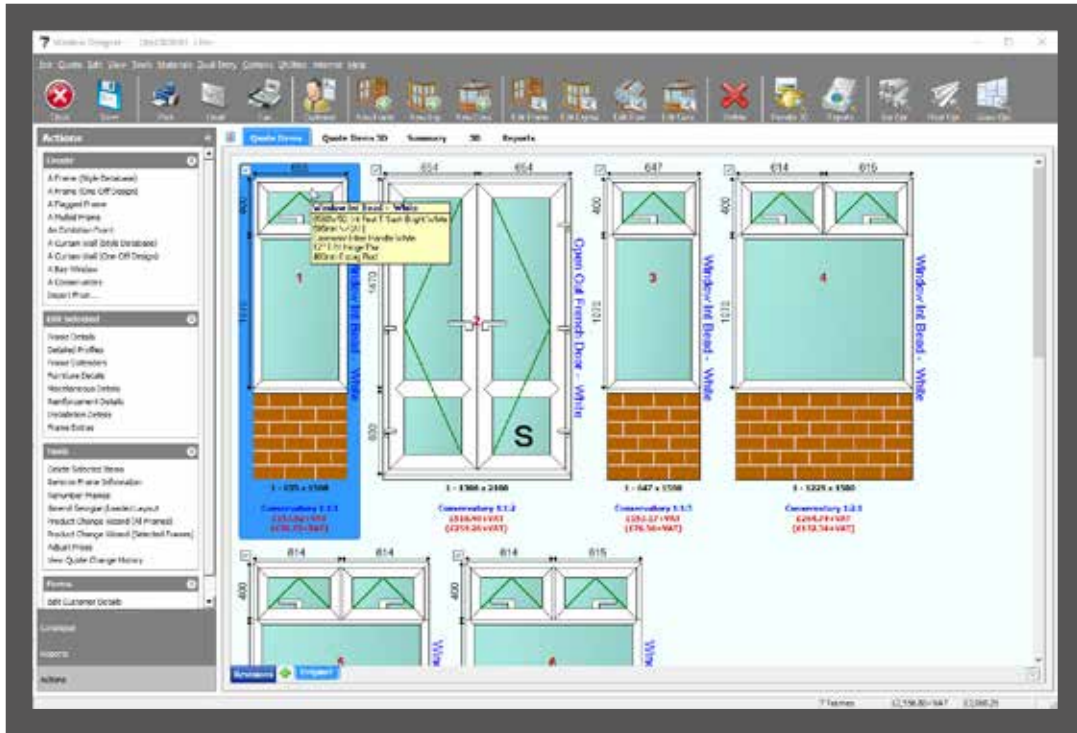

**Window Designs Online (WDO) is a revolutionary compiler that enables a customer to build not only their own, bespoke printed brochure but also generate a dynamic, personalised website with built-in SEO.**

Using pages from our extensive literature library, a customer can create an individual brochure that incorporates only the products they want to sell.

Combining a choice of covers and introductory text, logos, individual address and contact details to create an individual publication at a fraction of the cost of using a marketing company.

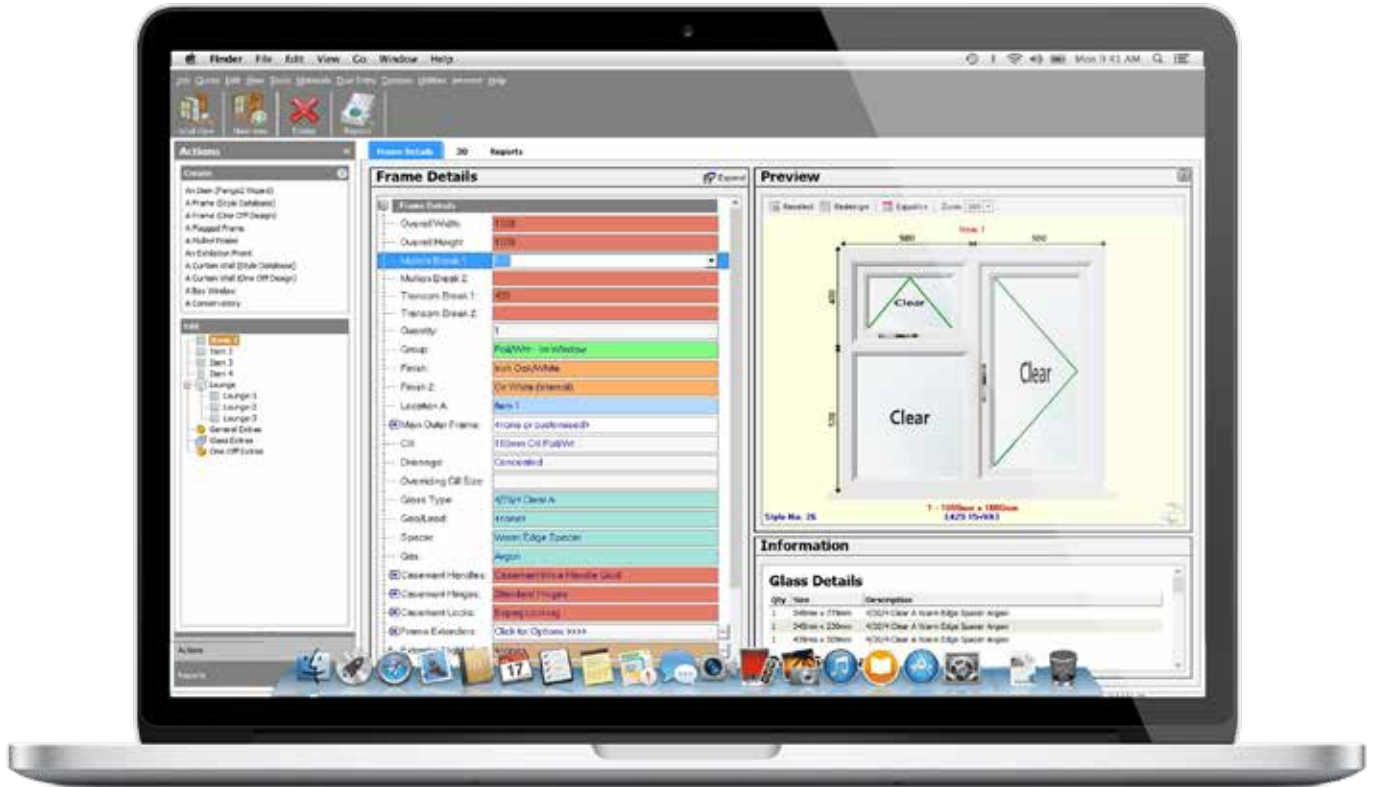

Services

# Window Designer

your online quotation and job management package

Services

**Window Designer** is accepted as the leading Fenestration software solution, and delivers cutting-edge functionality coupled with the required sales and manufacturing functionality demanded by today's fenestration industry.

**Window Designer** allows the design, pricing and manufacture of practically any style and shape of frame or door, including curved frames, composite doors and bi-folds. Whether it is trade, retail or commercial business, numerous pricing and multi-level discount structures can be implemented to cater for almost any situation.

## BEST CONFIGURATOR

**Window Designer** offers you the ability to configure frames in any way needed for manufacturing, all via an intuitive choice-based interface.

## MODERN REPORTING

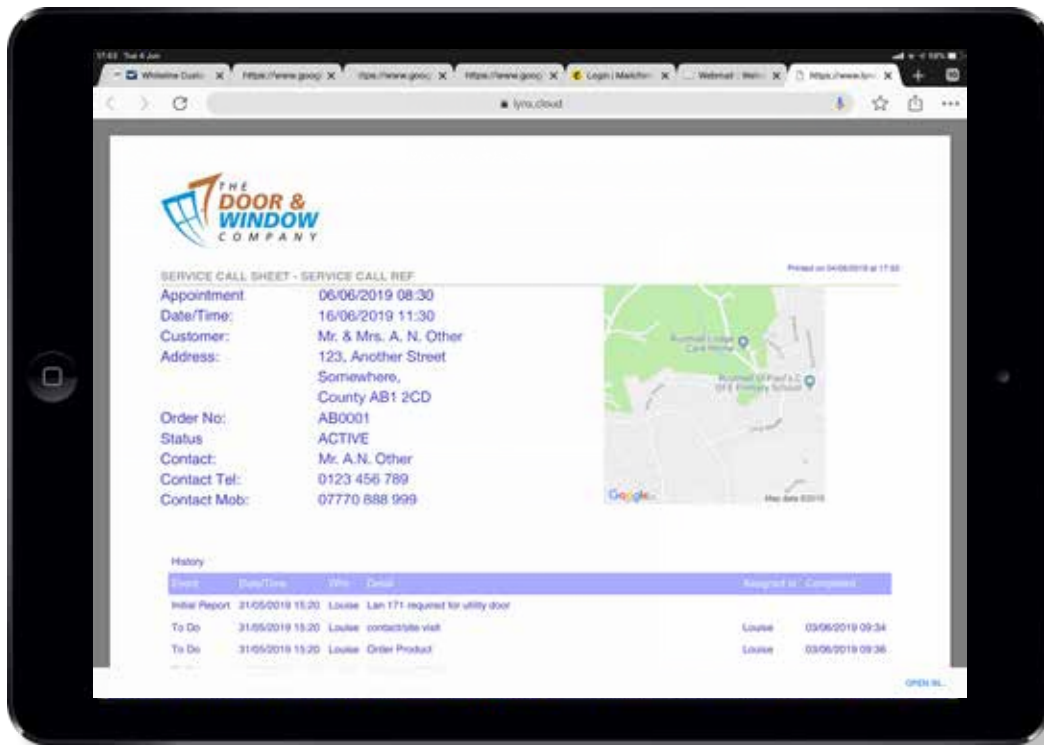

**Window Designer** has the tools available for you to create professional, modern reporting to make your business stand out from the rest.

## FULLY CONFIGURABLE

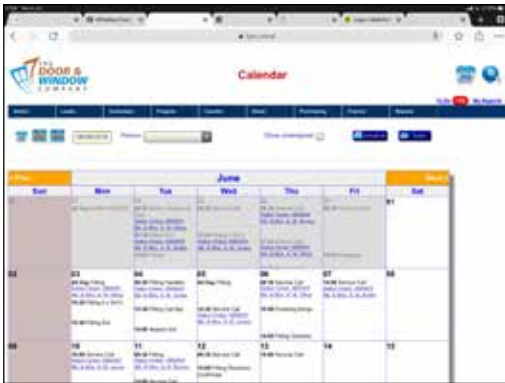

Unlike other solutions in the marketplace, **Window Designer** is open for configuration. If you need to make a change to a material list, you can

Services

### OPERATING

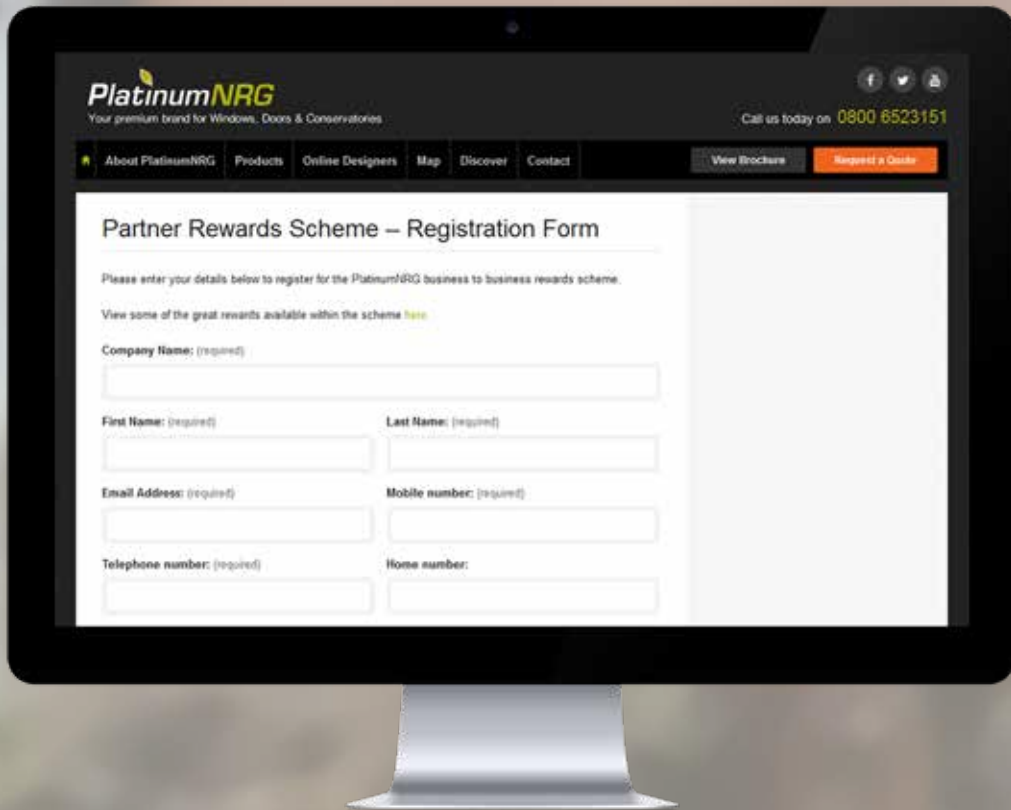

Track all your customer information and interactions in one place and on any device. Nurture and monitor sales leads until they're ready for selling.

### MANAGING

Monitor work-flow to make the best use of your time and those around you. Keep everyone up-to-date, any time and from any where.

### COPING

Don't miss a customer response, a manufacturer's update or a changed delivery. Working remotely, you can get an overview of your existing and past sales meaning you can be prepared for the future.

# rewards scheme

## sales staff incentive

### WHAT IT DOES

The Rewards Scheme is designed to incentivise and reward a company's staff who are responsible for sales. Every qualifying sale of PlatinumNRG products earn Reward Points.

These points are based on the total order value, which can then be collected and saved.

These points can then be converted into rewards - ranging from Store Vouchers to domestic appliances and entertainment.

### HOW

Each nominated staff member will need to register their personal details to join the scheme.

Once registered, each staff member will appear in the Whiteline Customer Area.

They will receive an email with their login credentials.

# accreditations

**BM TRADA** Product Certification provides assurance to specifiers, contractors and purchasers that products will perform to an agreed standard. It provides independent certification, testing and inspection, training and technical services all over the world.

All PlatinumNRG products are covered by the BM Trada Certification scheme.

The **UKCA** (UK Conformity Assessed) marking is a new UK product marking that will be used for goods being placed on the market in Great Britain (England, Wales and Scotland). It covers most goods which previously required the CE marking.

PlatinumNRG is proud to be a member of the **British Fenestration Rating Council**, the UK's national system for rating Energy Efficient Windows

**FENSA** (Fenestration Self-Assessment Scheme). Following Government encouragement, FENSA has been set up by the Glass and Glazing Federation (GGF) and other industry bodies, in response to Building Regulations for double glazing companies in England and Wales. When replacing windows and doors, homeowners must comply with current standards and ensure they obtain a certificate from FENSA (or similar approved) or Local Authority Building Control.

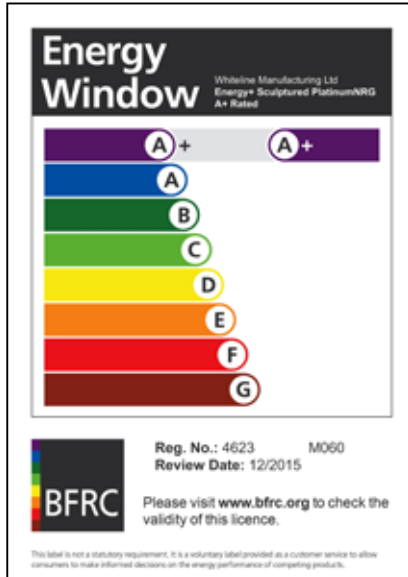

PlatinumNRG double-glazed PVCu casement windows can achieve the 'greenest' **Window Energy Ratings (WER)** rating of A+ for energy efficiency, if specified.

This is the official UK Police flagship initiative supporting the principles of 'designing out crime'. PlatinumNRG are very proud to have gained the **Secured by Design** accreditation for our products.

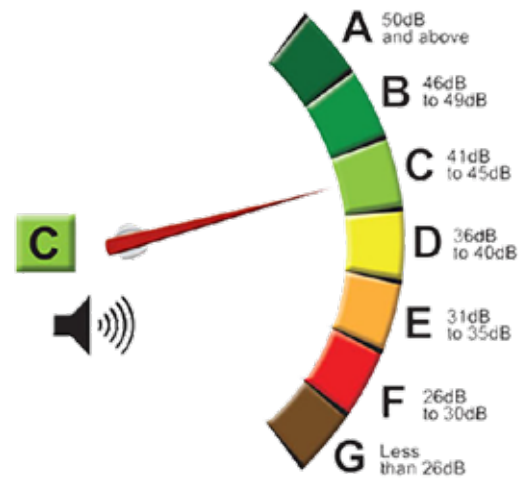

# certification

The **Window Energy Ratings** scheme was launched in the UK by the BFRF, a Government supported independent body which allows consumers to reliably compare one product with another.

The majority of our windows achieve an A-rating for energy efficiency and incorporate the very latest glazing technology using clear energy glass. UK homes create a quarter of the country's CO2 emissions.

By offering up to 3 times more thermal insulation than standard double glazing, our windows help eliminate energy loss from your home and are 20% better than Low-E thermally insulating glass.

Our windows were the first in the UK to achieve the **BM TRADA Window Acoustic Rating** label. We can offer windows in a number of decibel ratings to help in the reduction of sound.

Established in 1984, we are one of the largest producers of windows, doors and conservatories in the South East of England so you can feel secure in the knowledge that we will be around for many more years to come, supporting you via our network of installation partners.

Your guarantee as part of your contract of sale will always be with your installation provider. However, it is reassuring to know that the PlatinumNRG range of products are also covered by a comprehensive set of guarantees from us to our installation partners.
