TECHNICALLY ADVANCED, SECURE AND EFFICIENT DOOR SYSTEM

INNER STRENGTH OUTER BEAUTY

Our vast range of **fortrezz** doors combines all the benefits of modern materials, state of the art manufacturing techniques with unrivalled good looks...

We know from experience and because we've spent many years listening to our customers that peace of mind is essential. It's not enough to have a great looking product, it's not enough to have one that performs well during the harshest winter, or the hottest summer. When you come home at night and close the door behind you, you'll want to know that you're safe!

fortrezz doors are fitted, as standard, with the very latest and highest level of security locking systems currently available. There are no 'upgrade' issues, no having to re-think budgets after you've chosen your ideal door - it's all included within the product cost.

SECURE, STRONG AND RESISTANT TO ATTACK

Built from up to 17 layers of laminated solid timber, **fortrezz** doors are 10% thicker than your average door!

Kerto is a laminated veneered lumber (LVL) that delivers unparalleled strength and dimensional stability. The engineered make up comprises of cross-bonded veneers that greatly enhance lateral stability and stiffness. The combinations of all these elements make this a natural choice for high security Composite Doors.

Close a **fortrezz** door and you're immediately aware of the strength and solidity of the door. The reassuringly satisfying 'clunk' is so different to the typical foam-filled composite doors we see today.

Each **fortrezz** door consists of 5 morticed Hook Bolts. There are two at the top of the door, one in the centre and a second pair at the bottom. Each of these pairs work together to hook towards one another and ensure that not only can they deter entry by force, they are able to stop any attempt to lever the door apart - in any direction!

fortrezz doors are manufactured in the UK using UK based component companies to create the finished product. Our doors are fabricated to exacting standards and are compliant with all the necessary quality standards.

Our doors possess all necessary UKCA marking requirements, are Building Regulations Document Q compliant and can also carry the coveted 'Secured By Design' security standard if specified. All our doors are fitted with the highest level of key locks which are both 3* security tested and approved. There is no better standard available in today's marketplace.

19
COLOURS

19 COLOURS TO CHOOSE FROM

With over 80 stylish door designs, 19 colours and an amazing choice of glazing and hardware accessories in our collection, you're sure to find the ideal fit for your home.

We can provide a door design and colour that sympathetically matches the architectural style of your home or contrasts with it to make a visual statement!

In addition to this, we have a wide range of hardware styles that encompass centuries of architectural styles. Ranging from traditional pewter and forged iron up to more contemporary styles in marine-grade stainless steel.

Our French Doors are available in an extensive range of styles, sizes and colour finishes, but to enhance the versatility further still, certain designs of doors can also be specified as an 'Offset' product. This allows narrow apertures, such as porch entrances for example, to benefit with the primary door being wider than the second 'slave' door.

The doors are fitted with a 3 point deadbolt system, locking the main door leaf into the slave leaf from top to bottom. With each set of doors having the benefit of balanced handles, it's reassuring to know that there are various colour options available to choose from.

Each door set has an interlocking central mullion which is available in either White, Polished anodised Gold or Silver finish only. Please do note however, that French Doors are available as OPEN IN only. Minimum width of double doors is 1728mm and the maximum is 1998mm (Including door frame) Minimum width of offset doors is 1243mm and the maximum is 1542mm (Including door frame)

HALF PANEL MOULDED SINGLE

HALF PANEL MOULDED TWIN

To further enhance your choices, doors can be specified with various combinations of full height side panels or half and quarter panels which allow the additional use of simple glass units.

Your representative will be able to walk through all the available options open to you during their visit.

STABLE DOORS

If you are looking for a door to suit a traditional property, or simply trying to add more convenience to your everyday lives, then look no further than a classic Stable Door. Suitable as both Front and Back Doors, they are available in an extensive array of styles and colours.

The door comes with not one, but two completely separate high security locks, with a high strength centre gearbox. A conventional handle operates the top lock and a key/thumb turn operates the bottom lock which is fitted with a roller latch for ease of use. Of course, a single key fits both parts, meaning no need to carry more than one.

- Available as **OPEN IN** only.
- Key operated bottom lock escutcheon.
- Central meeting rail seal is available in a choice of finishes.
- Central locking shoot bolt is available in a choice of finishes.

Neutrals ensure that your home remains timeless and grows with you over the years as your style and needs change.

The versatility of **Grey** and its often chameleon-like qualities, makes it suitable for almost every style of home. From grey to black, their qualities can blend in well with most surroundings.

Primaries give strong, bold accents and are as comfortable on traditional doors as they are on contemporary. When you want a more prominent statement, the choice of strong colours help emphasise your door.

Woodgrains are ideal for creating a warm and homely rustic appearance although with modern hardware make a striking contrast on contemporary architecture.

A wide range of colours and finishes to suit traditional and modern styles of windows and doors. These finishes apply to the majority of products which makes it easier to suite windows and doors

Pewter and Forged Black finishes are available for a small selection of our hardware and emulates the centuries-old ironmongery steeped in British history. Our stainless steel is in fact marine-quality 316 stainless steel and NOT an applied finish. It has a very sleek contemporary appearance in addition to it's excellent weathering qualities.

SPRUNG OFFSET LEVER/ LEVER
(60-70MM DOOR THICKNESS)

OFFSET HANDLE

Offset handles use two separate spindles. As the spindles don't align with each other, the handles must be offset from one another to avoid contact. If you close the door from inside it locks on the latch and no one can enter. From outside pull the door to, lift the handle to engage the latches and then turn the key to deadlock the door.

INLINE HANDLE

When the handles on either side of a door are joined by a single spindle - the handle remains operational from inside and outside which removes the risk of the door closing and locking you out. To lock the door from either side, a key-lock must be used. As the spindle is one-piece, the handles must be inline with each other from either side, hence the term inline handle.
